## Summary

I am Yugojoyoti Mohanta, a physics enthusiast with a Master's degree from IISER Berhampur. My passion for web development has led me to become a skilled full-stack developer proficient in technologies like React, Node.js, Express, and MongoDB. Additionally, I have expertise in Golang and Flutter, making me a versatile software developer capable of tackling diverse projects. With a commitment to staying up-to-date with industry trends and a dedication to delivering high-quality results, I'm eager to contribute to exciting technology projects and collaborations.
